## SNOW WALKING

### ICE LOCK **Maximum grip on slippery surfaces**

Kefas con la suola Ice Lock HG05 offre il meglio della trazione su ghiaccio e neve. I microfilamenti di vetro, inseriti nella mescola della gomma della suola, creano il massimo grip su superfici scivolose. Le soles Ice Lock HG05 sono prodotti assolutamente unici. Sono costruite con componenti innovativi come ad esempio la fibra di vetro, e il loro design favorisce una forte tenuta su tutti i terreni scivolosi, siano essi bagnati o ghiacciati. Il nuovo disegno della Suola contiene specifici profili e supporti che assicurano una miglior tenuta degli inserti ed una maggior resistenza all'usura nel tempo. Ice Lock HG05 trasforma per la prima volta la scarpa, in una scarpa adatta a tutte le stagioni; questo tipo di Suola è infatti utile, sia per gli ambienti innevati che per quelli rocciosi. La tenuta della Suola in terreni molto scivolosi (in condizioni di ghiaccio) è di sei volte superiore a quella di qualunque altra suola.

Kefas footwear with Ice Lock HG05 offer the best traction on ice and snow. Micro-glass laments are electrostatically aligned in the Rubber compound of the sole to create maximum grip on slippery surfaces. Ice Lock HG05 soles are absolutely unique. They are built with innovative components such as glass fiber, and their design assures an increased grip on slippery wet or icy surfaces. The new design of the sole supports and contains specific profiles that provide a better grip inserts and a greater wear resistance over time. Ice Lock HG05 turns for the first time the shoe in a shoe suitable for all seasons, this type of sole is indeed useful, both for snowy or rocky terrains. The traction on very slippery surfaces (on ice) is six times higher than that of any other sole.

### THINSULATE **Keep you warm**

Gli isolanti termici THINSULATE utilizzati nel settore delle calzature garantiscono calore e comfort anche in condizioni climatiche di freddo estremo. Un leggero isolamento termico per il vostro benessere, elevata protezione dal freddo abbinata ad uno spessore ridotto assicurano maggior comfort e libertà di movimento, elevato isolamento termico anche in condizioni climatiche di umidità e di pioggia, alta traspirabilità, ottima resistenza al lavaggio, facile manutenzione.

Whether it's clothing or shoes, boots or gloves - you can forget about the cold because THINSULATE Insulation always keeps you warm. Light-weight thermal insulation for maximum comfort, slimline optimum thermal insulation, also keeps you warm in damp or wet conditions, less bulk for excellent comfort, superior active-breathing performance, durable and easy-care material.

### VIBRAM **Tested where it matters**

Ogni Suola Vibram è studiata per offrire all'utilizzatore più esigente il massimo delle prestazioni in termini di comfort e durata. Collaudi e controlli severi, uniti all'esperienza, fanno delle soles Vibram il meglio che una scarpa possa indossare.

Each Vibram sole has been designed to offer maximum performace, comfort and durability to even the most demanding user. Rugged tests and stringent controls make Vibram soles the best shoes to wear.

### FELT ALUMINIUM **Best thermal insulation system**

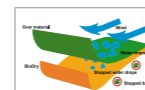

Il sistema composto dalla scarpetta interna estraibile in feltro e alluminio rende le nostre calzature ideali per affrontare anche le condizioni climatiche più estreme, grazie all'isolamento termico dell'alluminio e al caldo confortevole del feltro.

The system consists of an extractable internal shoe made of felt and aluminum. This system makes our footwear ideal to tackle even the most extreme weather conditions, thanks to the thermal insulation of the aluminum and the warm comfort of the felt.

### BIODRY **Water resistant, antibacterial, breathable, antistatic**

La Fodera antibatterica limita i cattivi odori e favorisce la sensazione di freschezza sul piede. Nelle calzature con sistema BioDry, la Fodera utilizzata, grazie alle sue particelle d'argento, ostacola lo sviluppo dei batteri, evitando cattivi odori e fastidiose allergie dovute al surriscaldamento del piede. L'esclusiva membrana resistente all'acqua BioDry (e le sue cuciture termosigillate) rappresenta un'eccellente protezione contro la pioggia, la neve e il gelo, garantendo isolamento termico e confort ottimali.

The antibacterial lining limits unpleasant odours and keeps the skin cool. Thanks to its special silver particles of the polymeric matrix, Biodry system the technological lining inhibits bacterial growth in order to avoid unpleasant odours and foot over heating as well as annoying allergies. The water resistant Biodry membrane (and its thermo sealed seams) used in this shoe represents a great protection against rain, snow and ice, as well as an excellent thermal insulation and an optimal comfort.
